FUJITSU LIMITED provided technical input and review on portions of this material.

Sun Microsystems, Inc. and Fujitsu Limited each own or control intellectual property rights relating to products and technology described in this document, and such products, technology and this document are protected by copyright laws, patents and other intellectual property laws and international treaties. The intellectual property rights of Sun Microsystems, Inc. and Fujitsu Limited in such products, technology and this document include, without limitation, one or more of the United States patents listed at <http://www.sun.com/patents> and one or more additional patents or patent applications in the United States or other countries.

This document and the product and technology to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of such product or technology, or of this document, may be reproduced in any form by any means without prior written authorization of Fujitsu Limited and Sun Microsystems, Inc., and their applicable licensors, if any. The furnishing of this document to you does not give you any rights or licenses, express or implied, with respect to the product or technology to which it pertains, and this document does not contain or represent any commitment of any kind on the part of Fujitsu Limited or Sun Microsystems, Inc., or any affiliate of either of them.

This document and the product and technology described in this document may incorporate third-party intellectual property copyrighted by and/or licensed from Fujitsu Limited and Sun Microsystems, Inc., including software and font technology.

Per the terms of the GPL or LGPL, a copy of the source code governed by the GPL or LGPL, as applicable, is available upon request by the End User. Please contact Fujitsu Limited or Sun Microsystems, Inc.

This distribution may include materials developed by third parties.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and in other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, Java, Netra, Solaris, Sun StorEdge, docs.sun.com, OpenBoot, SunVTS, Sun Fire, SunSolve, CoolThreads, J2EE, and Sun are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and other countries.

Fujitsu and the Fujitsu logo are registered trademarks of Fujitsu Limited.

All SPARC trademarks are used under license and are registered trademarks of SPARC International, Inc. in the U.S. and other countries. Products bearing SPARC trademarks are based upon architecture developed by Sun Microsystems, Inc.

SPARC64 is a trademark of SPARC International, Inc., used under license by Fujitsu Microelectronics, Inc. and Fujitsu Limited.

The OPEN LOOK and Sun™ Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

United States Government Rights - Commercial use. U.S. Government users are subject to the standard government user license agreements of Sun Microsystems, Inc. and Fujitsu Limited and the applicable provisions of the FAR and its supplements.

Disclaimer: The only warranties granted by Fujitsu Limited, Sun Microsystems, Inc. or any affiliate of either of them in connection with this document or any product or technology described herein are those expressly set forth in the license agreement pursuant to which the product or technology is provided. EXCEPT AS EXPRESSLY SET FORTH IN SUCH AGREEMENT, FUJITSU LIMITED, SUN MICROSYSTEMS, INC. AND THEIR AFFILIATES MAKE NO REPRESENTATIONS OR WARRANTIES OF ANY KIND (EXPRESS OR IMPLIED) REGARDING SUCH PRODUCT OR TECHNOLOGY OR THIS DOCUMENT, WHICH ARE ALL PROVIDED AS IS, AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID. Unless otherwise expressly set forth in such agreement, to the extent allowed by applicable law, in no event shall Fujitsu Limited, Sun Microsystems, Inc. or any of their affiliates have any liability to any third party under any legal theory for any loss of revenues or profits, loss of use or data, or business interruptions, or for any indirect, special, incidental or consequential damages, even if advised of the possibility of such damages.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Entrée et revue tecnica fournies par FUJITSU LIMITED sur des parties de ce matériel.

Sun Microsystems, Inc. et Fujitsu Limited détiennent et contrôlent toutes deux des droits de propriété intellectuelle relatifs aux produits et technologies décrits dans ce document. De même, ces produits, technologies et ce document sont protégés par des lois sur le copyright, des brevets, d'autres lois sur la propriété intellectuelle et des traités internationaux. Les droits de propriété intellectuelle de Sun Microsystems, Inc. et Fujitsu Limited concernant ces produits, ces technologies et ce document comprennent, sans que cette liste soit exhaustive, un ou plusieurs brevets déposés aux États-Unis et indiqués à l'adresse <http://www.sun.com/patents> de même qu'un ou plusieurs brevets ou applications brevetées supplémentaires aux États-Unis et dans d'autres pays.

Ce document, le produit et les technologies afférents sont exclusivement distribués avec des licences qui en restreignent l'utilisation, la copie, la distribution et la décompilation. Aucune partie de ce produit, de ces technologies ou de ce document ne peut être reproduite sous quelque forme que ce soit, par quelque moyen que ce soit, sans l'autorisation écrite préalable de Fujitsu Limited et de Sun Microsystems, Inc., et de leurs éventuels bailleurs de licence. Ce document, bien qu'il vous ait été fourni, ne vous confère aucun droit et aucune licence, expresses ou tacites, concernant le produit ou la technologie auxquels il se rapporte. Par ailleurs, il ne contient ni ne représente aucun engagement, de quelque type que ce soit, de la part de Fujitsu Limited ou de Sun Microsystems, Inc., ou des sociétés affiliées.

Ce document, et le produit et les technologies qu'il décrit, peuvent inclure des droits de propriété intellectuelle de parties tierces protégés par copyright et/ou cédés sous licence par des fournisseurs à Fujitsu Limited et/ou Sun Microsystems, Inc., y compris des logiciels et des technologies relatives aux polices de caractères.

Par limites du GPL ou du LGPL, une copie du code source régi par le GPL ou LGPL, comme applicable, est sur demande vers la fin utilisateur disponible; veuillez contacter Fujitsu Limited ou Sun Microsystems, Inc.

Cette distribution peut comprendre des composants développés par des tierces parties.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux États-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, Java, Netra, Solaris, Sun StorEdge, docs.sun.com, OpenBoot, SunVTS, Sun Fire, SunSolve, CoolThreads, J2EE, et Sun sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux États-Unis et dans d'autres pays.

Fujitsu et le logo Fujitsu sont des marques déposées de Fujitsu Limited.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux États-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

SPARC64 est une marques déposée de SPARC International, Inc., utilisée sous le permis par Fujitsu Microelectronics, Inc. et Fujitsu Limited.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciés de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui, en outre, se conforment aux licences écrites de Sun.

Droits du gouvernement américain - logiciel commercial. Les utilisateurs du gouvernement américain sont soumis aux contrats de licence standard de Sun Microsystems, Inc. et de Fujitsu Limited ainsi qu'aux clauses applicables stipulées dans le FAR et ses suppléments.

Avis de non-responsabilité: les seules garanties octroyées par Fujitsu Limited, Sun Microsystems, Inc. ou toute société affiliée de l'une ou l'autre entité en rapport avec ce document ou tout produit ou toute technologie décrit(e) dans les présentes correspondent aux garanties expressément stipulées dans le contrat de licence régissant le produit ou la technologie fourni(e). SAUF MENTION CONTRAIRE EXPRESSÉMENT STIPULÉE DANS CE CONTRAT, FUJITSU LIMITED, SUN MICROSYSTEMS, INC. ET LES SOCIÉTÉS AFFILIÉES REJETTENT TOUTE REPRÉSENTATION OU TOUTE GARANTIE, QUELLE QU'EN SOIT LA NATURE (EXPRESSE OU IMPLICITE) CONCERNANT CE PRODUIT, CETTE TECHNOLOGIE OU CE DOCUMENT, LESQUELS SONT FOURNIS EN L'ÉTAT. EN OUTRE, TOUTES LES CONDITIONS, REPRÉSENTATIONS ET GARANTIES EXPRESSES OU TACITES, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE À LA QUALITÉ MARCHANDE, À L'APTITUDE À UNE UTILISATION PARTICULIÈRE OU À L'ABSENCE DE CONTREFAÇON, SONT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE. Sauf mention contraire expressément stipulée dans ce contrat, dans la mesure autorisée par la loi applicable, en aucun cas Fujitsu Limited, Sun Microsystems, Inc. ou l'une de leurs filiales ne sauraient être tenues responsables envers une quelconque partie tierce, sous quelque théorie juridique que ce soit, de tout manque à gagner ou de perte de profit, de problèmes d'utilisation ou de perte de données, ou d'interruptions d'activités, ou de tout dommage indirect, spécial, secondaire ou consécutif, même si ces entités ont été préalablement informées d'une telle éventualité.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE A LA QUALITÉ MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIERE OU A L'ABSENCE DE CONTREFAÇON.

Important Information About the Sun SPARC Enterprise T2000 Server

These product notes contain important and late-breaking information about the SPARC Enterprise T2000 server.

The following sections are included:

- [“Support for the SPARC Enterprise T2000 Server” on page 1](#)
- [“Supported Versions of Firmware and Software” on page 2](#)
- [“Required Patches” on page 3](#)
- [“Known Issues and Workarounds” on page 3](#)

Support for the SPARC Enterprise T2000 Server

This section includes where to obtain technical support, software, and documentation.

Technical Support

If you have any technical questions or issues that are not addressed in the SPARC Enterprise T2000 server documentation, contact your local support services representative. For customers in the U.S. or Canada, call 1-800-USA-4SUN (1-800-872-4786). For customers in the rest of the world, find the World Wide Solution Center nearest you by visiting the web site:

<http://www.sun.com/service/contacting/solution.html>

Software Resources

The Solaris™ Operating System and Sun Java™ Enterprise System software are preinstalled on your SPARC Enterprise T2000 server.

If it becomes necessary to reload the software, go to the following web site. You will find instructions for downloading software.

<http://www.sun.com/software/preinstall/>

Downloading Documentation

Instructions for installing, administering, and using your SPARC Enterprise T2000 server are provided in the SPARC Enterprise T2000 server documentation set. The entire documentation set is available for download from the following web site:

<http://www.sun.com/documentation/>

Note – Information in these product notes supersedes the information in the SPARC Enterprise T2000 documentation set.

Supported Versions of Firmware and Software

These are the minimum supported versions of firmware and software for this release of the SPARC Enterprise T2000 server:

- Solaris 10 11/06 Operating System (OS)
- Sun Java Enterprise System software (Java ES 2005Q4)
- System firmware 6.3.5, which includes Advanced Lights Out Manager (ALOM) CMT 1.3.5 software and OpenBoot™ 4.25.3 firmware.

Updating System Firmware

Firmware updates are available from SunSolveSM (sunsolve.sun.com) through patch releases. For details on how to update your system firmware, see Appendix A of the *Sun SPARC Enterprise T2000 Server Installation Guide*. For more details on the `flashupdate` command, see the *Advanced Lights Out Management (ALOM) CMT v1.x Guide*.

Note – Updating your system firmware also updates your ALOM CMT software and OpenBoot firmware.

Required Patches

At this time, there are no mandatory patches for SPARC Enterprise T2000 servers.

When required patches are available from <http://www.sun.com/sunsolve>.

Note – Before contacting support, ensure that all mandatory patches are installed on your server. In addition to installing these patches, check the SunSolve web site on a regular basis for the availability of new patches.

Patches for Option Cards

If you add option cards to your server, refer to the documentation and README files for each card to determine if additional patches are needed.

Known Issues and Workarounds

This section describes issues that are known to exist for this release of the SPARC Enterprise T2000 server.

Mandatory `/etc/system` File Entries

This section describes mandatory `/etc/system` file entries that must be listed in this file to ensure the optimal functionality of the server.

The following entry must be in the `/etc/system` file:

```
set pcie:pcie_aer_ce_mask=0x2001
```

▼ To Check and Create the Mandatory `/etc/system` File Entries

Perform this procedure in the following circumstances:

- Check that the entries are present before deploying the server.
- Create the entries after the Solaris OS is installed or updated.

1. Log in as superuser.

2. Check the `/etc/system` file to see if the mandatory lines are in the file.

```
# more /etc/system
*ident  "@(#)system      1.18 05/06/27 SMI" /* SVR4 1.5 */
*
* SYSTEM SPECIFICATION FILE
.
.
.
set pcie:pcie_aer_ce_mask=0x2001
.
```

3. If the entry is not there, add it:

- Use an editor to edit the `/etc/system` file and add both lines.
- Reboot the server.

General Functionality Issues

These are the functionality issues for this release.

Running SunVTS CPU Tests Causes Shutdown Due to Watchdog Timeout (CR 6498483)

Coolthreads servers running SunVTS CPU tests have encountered Solaris watchdog timeouts leading to system shutdown.

Workaround: Set the ALOM CMT `sys_autorestart` variable to `none` while running SunVTS, so that ALOM CMT issues a warning message but does not reset the server.

Solaris Predictive Self-Healing (PSH) Feature

The Solaris PSH implementation is not fully implemented in this release of the product. If a PSH message with a message ID of `FMD-8000-0W` occurs, refer to the instructions at: <http://www.sun.com/msg/FMD-8000-0W>.

Supported Sun Explorer Utility Version

The SPARC Enterprise T2000 server is supported by the Sun Explorer 5.7 (or later) data collection utility, but is not supported by earlier releases of the utility. Installing Sun Cluster or Sun Net Connect software from the preinstalled Java ES package could automatically install an earlier version of the utility on your system. After installing any of the Java ES software, determine whether an earlier version of the Sun Explorer product has been installed on your system by typing the following:

```
# pkginfo -l SUNWexplo
```

If an earlier version exists, uninstall it and install version 5.7, or later. To download version 5.7, go to:

<http://www.sun.com/sunsolve>

SPARC Enterprise T2000 Correctable Memory Errors in POST Can Be Misleading (CR 6479408)

POST error messages regarding unsupported memory configurations can be misleading. In situations where memory rank 0 (zero) is fully populated, the following message can be ignored safely.

```
ERROR: Using unsupported memory configuration
```

Erroneous Fault Messages Displayed After a Solaris OS JumpStart Installation

If you perform a Solaris JumpStart™ installation of a Sun SPARC Enterprise T2000 server, the server will display erroneous PSH fault messages at boot time. To correct this situation, you must install the SPARC Enterprise T2000 mandatory patches and make changes to the `/etc/system` file. In addition, you should also clear the PSH and ALOM CMT fault logs to prevent the erroneous messages from being reported again. The steps to do this are described in [“To Configure the System After a JumpStart Installation” on page 6](#).

Example of Erroneous Fault Messages at boot time:

```
SUNW-MSG-ID: SUN4-8000-0Y, TYPE: Fault, VER: 1, SEVERITY: Critical
EVENT-TIME: Fri Jan 27 22:17:36 GMT 2006
PLATFORM: SUNW,SPARC-Enterprise-T2000, CSN: -, HOSTNAME: xx
SOURCE: eft, REV: 1.13
EVENT-ID: d79b51d1-aca0-c786-aa50-c8f35ea0fba3
DESC: A problem was detected in the PCI-Express subsystem.
Refer to http://sun.com/msg/SUN4-8000-0Y for more information.
AUTO-RESPONSE: One or more device instances may be disabled
IMPACT: Loss of services provided by the device instances
associated with this fault
REC-ACTION: Schedule a repair procedure to replace the affected
device. Use fmdump -v -u EVENT_ID to identify the device or contact
Sun for support.
```

Example of displaying the messages with the `fmdump` command:

```
# fmdump -v -u d79b51d1-aca0-c786-aa50-c8f35ea0fba3
TIME UID SUNW-MSG-ID
Jan 27 22:01:58.8757 d79b51d1-aca0-c786-aa50-c8f35ea0fba3 SUN4-
8000-0Y 100% fault.io.fire.asic
FRU: hc://product-id=SUNW,SPARC-Enterprise-T2000/component=IOBD
rsrc: hc:///ioboard=0/hostbridge=0/pciexrc=0
Jan 27 22:17:36.5980 d79b51d1-aca0-c786-aa50-c8f35ea0fba3 SUN4-
8000-0Y
100% fault.io.fire.asic
FRU: hc://product-id=SUNW,SPARC-Enterprise-T2000/component=IOBD
rsrc: hc:///ioboard=0/hostbridge=0/pciexrc=0
```

▼ To Configure the System After a JumpStart Installation

This procedure describes how to configure the SPARC Enterprise T2000 server after a jumpstart installation so that erroneous fault messages are not reported.

1. Install the mandatory patches on the server.
2. Update the `/etc/system` file.
See [“Mandatory /etc/system File Entries”](#) on page 4.
3. Use the `fmadm faulty` command to list the UUID of each erroneous fault.

```
# fmadm faulty
```

4. Clear each fault that was listed in the preceding step.

```
# fmadm repair d79b51d1-aca0-c786-aa50-c8f35ea0fba3
```

5. Clear the persistent logs as shown in the following example.

```
# cd /var/fm/fmd  
# rm e* f* c*/eft/* r**/*
```

6. Reset the Solaris PSH modules as shown.

```
# fmadm reset cpumem-diagnosis  
# fmadm reset cpumem-retire  
# fmadm reset eft  
# fmadm reset io-retire
```

7. Reset the faults at the ALOM CMT prompt:

- a. Gain access to the ALOM CMT `sc>` prompt.

Refer to the *Advanced Lights Out Management (ALOM) CMT v1.x Guide* for instructions.

- b. Run the `showfaults -v` command to see the UUID of any faults.

```
sc> showfaults -v  
ID Time                FRU                Fault  
0 Jan 27 22:01 hc://product-id=SUNW,SPARC-Enterprise-  
T2000/component=IOBD Host detected fault, MSGID:  
SUN4-8000-0Y UUID: d79b51d1-aca0-c786-aa50-c8f35ea0fba3
```

- c. Run the **clearfault** command with the UUID provided in the `showfaults` output:

```
sc> clearfault d79b51d1-aca0-c786-aa50-c8f35ea0fba3  
Clearing fault from all indicted FRUs...  
Fault cleared.
```

8. If faults continue to be reported, the server might have a faulty component. Refer to the *Sun SPARC Enterprise T2000 Server Service Manual* for diagnostic procedures.

Specific Issues and Workarounds

[TABLE 1](#) lists known issues for which a change request ID (CR ID, formerly known as a bug ID) has been assigned. The table also lists possible workarounds for these issues.

For more information about these CRs, visit the SunSolve web site.

TABLE 1 Specific Issues for the SPARC Enterprise T2000 Server (1 of 5)

CR ID	Description	Workaround
6310384	The SunVTS USB keyboard test (<code>usbtest</code>) reports that a keyboard is present when there is no keyboard attached to the server.	Do not run the <code>usbtest</code> .
6312364	When accessing the host through the ALOM CMT <code>console</code> command, you might experience slow console response.	For optimum responsiveness, access the host through the host network interfaces as soon as the host has completed booting the OS.
6314590	Executing the ALOM CMT <code>break</code> and <code>go</code> commands might cause the system to hang.	If the console hangs, reset the system.
6315238	Recycling AC power results in the following erroneous message: <code>Preceding SC reset due to watchdog</code>	Disregard this message.
6317382	Typing unrecognized commands or words at the <code>ok</code> prompt causes the system to return the following erroneous error: <code>ERROR: Last Trap</code> and might hang the server.	Disregard this erroneous error message. If the server hangs, reset the server from the system console.
6318208	Whenever the system resets, including after a POST reset, you might see the following message: <code>Host system has shut down</code>	Disregard this message. The system will be reset and display the OBP <code>ok</code> prompt as expected.
6325271	The console history boot and run logs are the same.	At this time, no workaround is available for this issue.
6336040	After a failed DIMM was cleared from the <code>asr</code> database, ALOM CMT might not properly reboot and returns the following error message: <code>No valid MEMORY configuration</code>	Wait 10 seconds after executing the <code>clearasrdb</code> command before executing the <code>resetsc</code> command. Refer to the <i>Sun SPARC Enterprise T2000 Server Service Manual</i> for information about clearing DIMM-related faults.

TABLE 1 Specific Issues for the SPARC Enterprise T2000 Server (2 of 5)

CR ID	Description	Workaround
6338365	Sun Net Connect 3.2.2 software does not monitor environmental alarms on the SPARC Enterprise T2000 server.	To receive notification that an environmental error has occurred, use the ALOM CMT <code>mgt_mailalert</code> feature to have ALOM CMT send an email when an event occurs. To check whether or not the environmental status of the server is ok, log on to ALOM CMT and run the <code>showfaults</code> command. To view a history of any events the server encountered, log on to ALOM CMT and run the <code>showlogs</code> command.
6338962	The system might hang after a panic when the <code>sync</code> command is used.	If the server hangs, reset the server from the system console.
6341045	If a CPU or memory fault occurs while the server is running a trap handler, the system might panic with a bad trap instead of providing a CPU or memory fault message. In such cases, memory scrubbing is not performed.	Reset the server, and check the server for possible faults using the <code>showfaults</code> command.
6343294	When a Solaris PSH error is detected and reported, the following erroneous message (in addition to the correct message) might be reported: <code>msg = warning: bad proto frame implies corrupt/lost msg(s)</code>	Disregard the erroneous message.
6342192	The server does not answer incoming calls on the ALOM CMT serial management port.	Do not connect a modem to the ALOM CMT serial port.
6347456	SunVTS memory tests, in rare cases, might log a warning message similar to the following when the ECC Error Monitor (<code>errmon</code>) option is enabled: <code>WARNING: software error encountered while processing /ar/fm/fmd/errlog</code> Additional-Information: end-offile reached	Do not enable the <code>errmon</code> option. The <code>errmon</code> option is disabled by default.
6344888	The system might generate erroneous fault messages with the following message IDs: <code>SUN4-8000-ER</code> <code>SUN4-8000-OY</code> <code>SUN4-8000-75</code> <code>SUN4-8000-D4</code>	Make sure that the following line is in the <code>/etc/system</code> file: <code>set pcie:pcie_aer_ce_mask=0x2001</code> See “Mandatory /etc/system File Entries” on page 4 .

TABLE 1 Specific Issues for the SPARC Enterprise T2000 Server (3 of 5)

CR ID	Description	Workaround
6368136	The ALOM <code>showlogs -p p</code> command displays a lot of data and could slow down the ALOM CLI.	To display the persistent log, use the following command instead: <code>showlogs -e x</code> where <i>x</i> specifies the number of lines (most recent log entries) to be displayed.
6368944	At the <code>ok</code> prompt, you can only enter text up to 114 characters.	Do not attempt to enter more than 114 characters at the <code>ok</code> prompt.
6380987	When a grounding wire is connected to the grounding pin on the rear of the chassis, it is not possible to change rear blower without removing the ground connection.	If you need to replace the rear blower unit, and there is a grounding wire connected, remove the grounding wire to access the blower unit.
6381064	The system cannot boot if a Sun type-7 keyboard is plugged into one of the front USB ports.	Do not plug a type-7 keyboard into any of the front USB ports. Instead, use a different kind of keyboard, or use the rear USB ports.
6408619	The server fails to boot from a Linux tftp boot server on the network.	Use a Solaris OS tftp boot server.
n/a	X-option and replacement hard drives might not have an electronic disk label.	If you plan to replace or add a hard drive to your server, the drive might not have an electronic disk label and you must run the <code>Format</code> utility to label the drive. Instructions for labeling the drive are provided in a document titled <i>Labeling Unlabeled Hard Drives</i> (part number 819-3805), which is posted with the Sun SPARC Enterprise T2000 server documentation at: http://www.sun.com/documentation
6520334	If SSH is not enabled, executing the <code>ssh-keygen -l</code> command to print keys generates the following error message: <code>sc> ssh-keygen -l -t rsa</code> Fingerprint file can't be opened error 380003 This error message should read as follows: <code>ssh is not enabled.</code>	Enable SSH.
6508432	Many correctable errors (CE) could occur, and although these errors are correctable, the system could panic.	Add the following entry to <code>/etc/system</code> to avoid the problem: <code>set pcie:pcie_aer_ce_mask = 0x2001</code> See "Mandatory <code>/etc/system</code> File Entries" on page 4.

TABLE 1 Specific Issues for the SPARC Enterprise T2000 Server (4 of 5)

CR ID	Description	Workaround
6538717	The <code>showfru</code> command reports Micron DIMMs as Seagate DIMMs. For example: [LE2]FRU_PROM at MB/CMP0/CH0/R0/D0/SEEPROM /SPD/TimeStamp: MON APR 17 12:00:00 2006 /SPD/Description: DDR2 SDRAM, 1024 MB /SPD/Manufacture Location: /SPD/Vendor: Seagate <--should say Micron	Currently no workaround.
6520334	If SSH is not enabled, executing the <code>ssh-keygen -l</code> command to print keys generates the following error message: sc> ssh-keygen -l -t rsa Fingerprint file cant be opened error 380003 This error message should read as follows: ssh is not enabled.	Enable SSH.
6472072	When a panic dump is taken by <code>Break-D</code> of ALOM, the panic message displays as follows: Unrecoverable hardware error.	Hardware error does not occur. This message can be safely ignored.
6500293, 6502078	After executing <code>boot-r</code> , the <code>prtdiag-v</code> command might not display host bus adaptors on Sun SPARC Enterprise T1000 or T2000 servers.	Reboot the system without reconfiguration.

TABLE 1 Specific Issues for the SPARC Enterprise T2000 Server (5 of 5)

CR ID	Description	Workaround
n/a	When the following devices are connected with <code>ttya</code> (Dsub 9pin) on Sun SPARC Enterprise T1000 or T2000 servers, you cannot install the Solaris OS. <ul style="list-style-type: none">• SH4124T (Dsub 9pin)• Cisco Catalyst2960 (RJ45)• SPARC Enterprise T2000 (Dsub 9pin)	Install Solaris OS with nothing connected with <code>ttya</code> (Dsub 9pin).
n/a	When the following devices are connected with <code>ttya</code> (Dsub 9pin) on SPARC Enterprise T1000 or T2000 servers, you cannot log into the ALOM console. <ul style="list-style-type: none">• SH4124T (Dsub 9pin)• Cisco Catalyst2960 (RJ-45)• SPARC Enterprise T2000 Server (Dsub 9pin)	Log into the ALOM console with nothing connected with <code>ttya</code> (Dsub 9pin). Or, connect to ALOM with an RJ-45 cable when you use it.
6542956	Under heavy load, systems with UltraSPARC T1 1.4GHz processors could display false warnings in the <code>MB/V_VCORE</code> parameter of the <code>showenvironment</code> table. This occurs because the <code>showenvironment</code> command, to provide timely results, does not perform value averaging. Thus, it could appear that a sensor or environmental reading exceeded a threshold and did not generate a fault. If this occurs, system logs and the <code>showenvironment</code> table will not match.	Currently no workaround available.

Documentation Errata

Error Regarding Date Synchronization in the ALOM CMT Guide

There is an error in the documentation of the `showdate` command in published versions of the ALOM CMT guide. The erroneous text follows:

Displays the ALOM CMT date. The Solaris OS and ALOM CMT time are synchronized, but ALOM CMT time is expressed in Coordinated Universal Time (UTC) rather than local time.

The correct text should be:

Displays the ALOM CMT date. ALOM CMT time is expressed in Coordinated Universal Time (UTC) rather than local time. The Solaris OS and ALOM CMT time are not synchronized.

Typographic Error in Translated Versions of the *Sun SPARC Enterprise T2000 Server Installation Guide*

There might be a typographical error in the translated versions of the *Sun SPARC Enterprise T2000 Server Installation Guide*. The error is not present in the English version.

The error is located in Chapter 2, in the section titled, “To Boot the Solaris Operating system, in the example in Step 2.

The incorrect example shows the following:

```
ok boot / pci@7c0/pci@0/pci@2/pci@0,2/LSILogic,sas@4/disk@0,0p
```

There is a space after the first / that should not be there.

The following line shows the correct example:

```
ok boot /pci@7c0/pci@0/pci@2/pci@0,2/LSILogic,sas@4/disk@0,0p
```
